

over the related service period, net of estimated forfeitures (see Note 10 — Stock-Based Compensation in the Notes to the Consolidated Financial Statements).

Determining the appropriate fair value model and calculating the fair value of stock compensation awards requires the input of certain highly complex and subjective assumptions, including the expected life of the stock compensation awards and the Company's Common Stock price volatility. In addition, determining the appropriate amount of associated periodic expense requires management to estimate the rate of employee forfeitures and the likelihood of achievement of certain performance targets. The assumptions used in calculating the fair value of stock compensation awards and the associated periodic expense represent management's best estimates, but these estimates involve inherent uncertainties and the application of judgment. As a result, if factors change and the Company deems it necessary in the future to modify the assumptions it made or to use different assumptions, or if the quantity and nature of the Company's stock-based compensation awards changes, then the amount of expense may need to be adjusted and future stock compensation expense could be materially different from what has been recorded in the current period.

Restructuring and other accruals – We may record accruals for severance costs, costs associated with excess facilities that we have leased, contract terminations, asset impairments, and other costs as a result of on-going actions we undertake to streamline our organization, reposition certain businesses and reduce ongoing costs. Estimates of costs to be incurred to complete these actions, such as future lease payments, sublease income, the fair value of assets, and severance and related benefits, are based on assumptions at the time the actions are initiated. These accruals may need to be adjusted to the extent actual costs differ from such estimates. In addition, these actions may be revised due to changes in business conditions that we did not foresee at the time such plans were approved.

We also record accruals during the year for our various employee cash incentive programs. Amounts accrued at the end of each reporting period are based on our estimates and may require adjustment as the ultimate amount paid for these incentives are sometimes not known with certainty until after year end.

RESULTS OF OPERATIONS

The following table summarizes the changes in selected line items in our Consolidated Statements of Operation for the periods indicated (dollars in thousands):

	2009 vs. 2008				2008 vs. 2007			
	Twelve Months Ended December 31, 2009 (a)	Twelve Months Ended December 31, 2008	Dollar Increase (Decrease)	Percentage Increase (Decrease)	Twelve Months Ended December 31, 2008	Twelve Months Ended December 31, 2007	Dollar Increase (Decrease)	Percentage Increase (Decrease)
Total revenues	\$1,139,800	\$1,279,065	\$(139,265)	(11)%	\$1,279,065	\$1,168,475	\$110,590	9%
